**Description of Problem**

Please include a detailed description of the issues, as well as a description of and a copy of any professional studies, citations or reports from government entities, recommended solutions, and any cost information or estimates. If additional space is needed, please attach.

In the interest of School safety we need to re key the both campuses. Currently the locksets on the classroom doors must be locked & unlocked from the outside. In the event of a lockdown a teacher has to open the door and step outside the classroom and use his/her room key to lock the door. This process takes way too long and is not safe. When a lockdown is initiated, time is of the essence and must be accomplished as quickly as possible. We want to instal "Classroom security" door locksets that may be locked from the inside. In the same light, we would like the the front office receptionist to be able to lock down their front doors from their desk, using a electrified locking system on those doors. With the touch of a toggle button the door could be locked or unlocked.
